

DETAILED DESIGN

Luxury handpainted finishes give this kitchen a definite edge

with a brief to create a kitchen with a very high level of detail, the team at Impala Kitchens set to work producing something really special. Successfully combining old-world charm with new-age design principles, the kitchen was designed to meet the needs and individual tastes of the owners.

Featuring a lightly toned colour palette to blend with the highly-polished timber floor, the space is finished with a range of embellishments including the Marina Isles handles and ornate mouldings that adorn the doors. The mouldings are a visual highlight and have been enhanced with dark blue liner to emphasise the doors.

The same colour was used to hand paint the interior of the display cabinets. The cupboards provide ample space to showcase precious pieces and when opened reveal an extraordinary print. Custom-made appliance cabinets with lift-up doors offer additional storage, while wine connoisseurs will love the handy wine rack.

A curved CaesarStone island bench brings style and functionality to the room, with the traditional-looking cooktop and overhead mantel located in the centre of the cabinetry wall for a symmetrical effect. A host of appliances have also been integrated into the design, adding to

the room's "balanced" appearance.

The kitchen's superior craftsmanship is illuminated by carefully positioned leadlights and sunlight spilling through the windows and roof of the adjoining glass pavilion. **LKB**
